

Site Squirrel

B 2 B + Employee

Track & Identify

Track anonymous people and remote workers visiting your website

Site Squirrel doesn't just identify the company, we identify the person. Learn how we go beyond the competition with + Employee, our Remote Worker and Employee Identification feature. Don't let those visitors working remotely pass you by - turn them into leads with Site Squirrel!

Track & Identify people and remote workers visiting your site

Did you realize that on average, 98% of your website visitors are anonymous? Not with Visual Visitor! Identify those people and companies that are interested in your business - this includes remote workers

- Convert that anonymous website traffic into actual names
- View the enriched contact and company data that visitor is affiliated with
- Know exactly where each visitor went on your site, how long they viewed each page, and more.

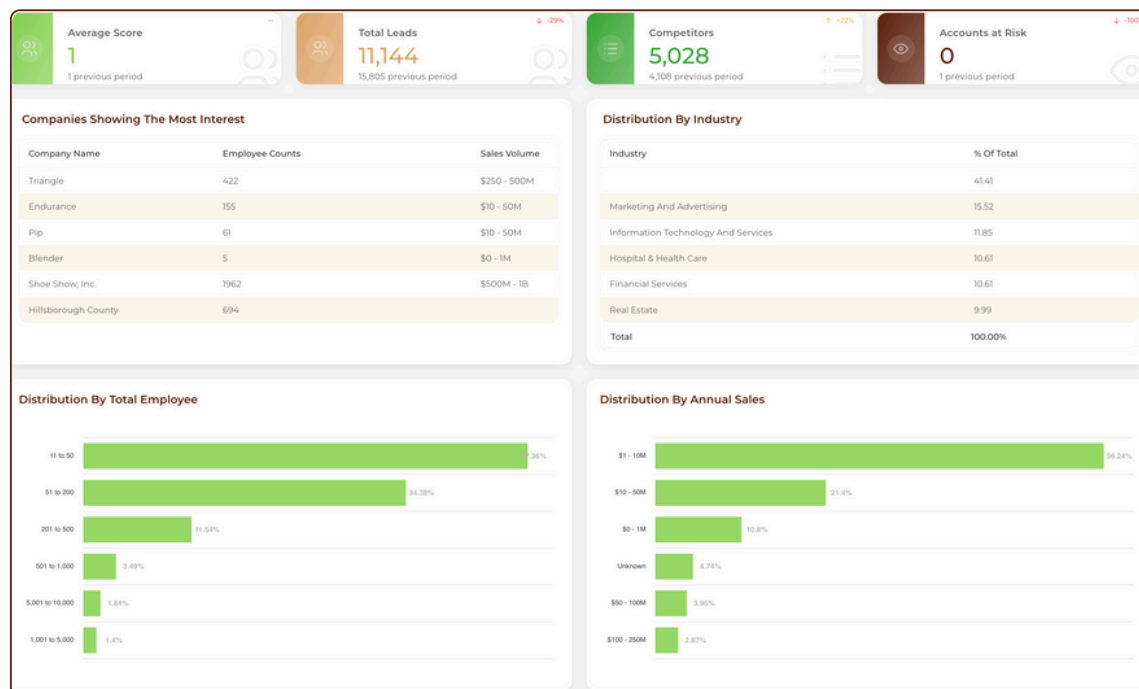

Save Time and Money—Qualify and connect high-value prospects

Access our Quality Contact Database

Our system can provide the contact data of the person visiting your site, not just the company they work for. With the changes in how businesses operate and the increase in the number of employees working from home, you need a system that can adapt and identify those remote workers. + Employee from Visual Visitor does just that! Reach out Faster with:

- Contact Data
- Education
- Job Title
- Job Function
- Skill Sets
- Company Firmographics

Site Squirrel

Features To Simplify Your Sales Process

Access our Quality Contact Database

Find Interested Companies

Find the companies that are ready to buy by filtering leads based on their engagement.

Employee and Remote Worker Identification

+ Employee takes identification to the next level and identifies the person visiting. We can identify employees and remote workers visiting your site.

700+ Million Contact Database

Reach out to the right person at the right time with access to over 700 million company and contact records.

Intent Data

B2B intent data can show which leads or prospects are actively researching on various third-party websites.

Integrations

Send your leads to more than 1,000 unique applications with our Zapier and WordPress integration.

Customized Filters

Get the leads you want by filtering your results based behavioral or firmographic data.

Email Alerts

We alert you by email when visitors are on your site. New, returning, or both - you set the parameters to fit your needs.

Per User Lead Handling

Per-user lead handling allows for the right leads to reach the right salespeople at the right time.

Our Quick and Easy Setup can get you tracking leads FAST

Sign Up for a Free Trial

Sign up for your 14-day Free Trial and install the tracking code on your website to get started. It's fast, it's easy, and it does not require a credit card.

Login to Your Dashboard

Log in to your Dashboard to customize your selections or just to get comfortable with the layout. Don't worry, we have tons of documentation and Live Demos available to answer any questions.

Start Identifying Visitors

Start identifying the people and companies that are visiting your website. Know what they are viewing, where they came from, and who they are.

Identify Remote Workers

Our system does not identify those remote workers as ISPs, we give you their names and company data! Go beyond with the ability to identify Remote Workers and Employees visiting your site.

Qualify and Engage

Now that you know who they are and where they went on your website, reach out to visitors. Be first to engage and win more customers.

Price Plans Start At Just \$299/month!
